Course Description Guide Obstetric

2024

Course Description Form

1. Course Name:
Internal medicine
2. Course Code:
Medu403
3. Semester / Year:
2023/2024
4. Description Preparation Date:
8/4/2024
5. Available Attendance Forms:
Attendance
6. Number of Credit Hours (Total) / Number of Units (Total)
Theory 30 Practical 90 Units 8
7. Course administrator's name (mention all, if more than one name)
Name: hameedah hadi abdulwahid Email: hameedah.hadi@uowa.edu.iq

8. Course Objectives

Course Objectives

1. To understand basic and clinical obstetric information.
2. To develop problem solving skills and understanding of circuit theory through the application of techniques.
3. The clinical courses trains the medical students intensely on basic skills of how to deal with obstetric patients, their relatives & community inside the obstetrical departments & emergency departments.
4. The medical students will be able to deal with emergent & elective

cases separately & will know the priorities during dealing with different obstetrical scennarios.

9. Teaching and Learning Strategies

Strategy

The main strategy that will be adopted in delivering this course is to encourage students' participation in the act of studying and learning, while at the same time refining and expanding their critical thinking skills. This will be achieved through classes, interactive tutorials, and by considering some seminars by the students themselves and short presentations of some obstetrical subjects to show their out upcoming experiments and activities that are interesting to the students

1. To graduate medical students with good demaneur & surgical ethics.
2. To make the medical students having the ability to face the obstetric causality cases armed with his basic & fundamental techniques for treating urgent obstetrical cases.
3. To graduate the medical students with the theoretical & practical Obstetrical information required to be a safe surgeon.
4. Build the medical students abilities to master the basic medical & surgical interventions like: obstetrical examination , interpretation of CTG , how to use partograph ... etc.

10. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
8 week	30 hour	1. Clinical history taking 2. Antenatal care 3. Physiological change in pregnancy 4. Anatomy of female genital tract 5. physiology of labour 6. normal labour 7. abnormal labour 8. assessment of fetal well-being 9. malpresentation & malposition 10. face presentation 11. Prenatal diagnosis 12. Multiple pregnancy 13. Infection in pregnancy 14. Anaemia in pregnancy 15. Hypertension in pregnancy 16. DM in pregnancy 17. Vomiting in pregnancy 18. PTL&pROM 19. IUGR&IUD 20. Prolong pregnancy 21. APH 22. PPH 23. Amniotic fluid abnormality 24. C.S&episiotomy 25. Operative delivery 26. DVT&pulmonary embolism 27. shoulder dystocia 28. perurperium 29. Cord prolapse		College hospital attendance	Quizzes and semester exams

		30. Maternal collapse 31. Rh isoimmunization 32. medical ethics

11. Course Evaluation

A - Excellent	امتياز	90 - 100	Outstanding Performance	
B - Very Good	جيد جدا	80 - 89	Above average with some errors	
C - Good	جيد	70 - 79	Sound work with notable errors	
D - Satisfactory	متوسط	60 - 69	Fair but with major shortcomings	
E - Sufficient	مقبول	50 - 59	Work meets minimum criteria	
FX – Fail	بقرار مقبول	(45-49)	More work required but credit awarded	
F – Fail	راسب	(0-44)	Considerable amount of work required	

12. Learning and Teaching Resources

Required textbooks (curricular books, if any)	obstetric by ten teachers
Main references (sources)	obstetric by ten teachers
Recommended books and references (scientific journals, reports...)	

Electronic References, Websites
